Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet
-- but bad policies allow companies like AT&T and Verizon to
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use the
700MHz spectrum auction to create an open network that gives
consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive
wholesale marketplace.
3. The freedom to access any content or services we want through
our devices.

Sincerely,

Alex A. Bobroff

Docket WT 06-150, 06-169, 96-86 and PS 06-229

7/24/2007 1:01:38 PM - Email Acknowledgement sent to seniormoment@comcast.net.

SeniorMoment@comcast.net wrote on 7/22/2007 8:26:31 AM :

I agree with Google's proposed terms for auctioning of the 700 MHz bandwidth, insofar as stated below:

"Google says that unless the FCC sets certain rules on the auction, existing large mobile operators will inevitably win the spectrum and competition in the market will stagnate. In order to prevent that, Google is urging the commission to ensure that end users can download any applications, services or content they want. Consumers should also be able to buy a phone and use it on any network. In addition, Google says the winner of the spectrum should be required to allow third parties to resell services over the network on a wholesale basis." [emphasis added by sender] source: <http://www.washingtonpost.com/wp-dyn/content/article/2007/07/20/AR2007072001869.html> <<http://www.washingtonpost.com/wp-dyn/content/article/2007/07/20/AR2007072001869.html>>

Personally, I am particularly bothered by the fact that I now have cell phones that can't be used effectively on other networks than the one I bought them for with limited exceptions that entail paying to unlock a phone to perhaps make it work with one other carrier only. This has resulted in premature discarding of phones, an unnecessary contribution to solid waste pollution and toxic wastes. I am also troubled by the fact the nation is showered with duplicative cell phone towers yet no carrier can offer service everywhere--they just differ in where their gaps are, even when roaming is free.

I do also believe there is merit in entertaining Response for Proposals for spectrum use. They FCC could then rule on the basis of a well defined point system that weighs the highest public values beyond price. The spectrum should also be leased for fixed time periods of perhaps 50 years instead of sold with periodic reviews just as apply to FCC TV station licensing.

Re: WC Docket No. 06-150
PS Docket No. 06-229
WT Docket No. 96-86

Dear Chairman,

As a subscriber to various communications medium, specifically wireless cellular networks, I urge you to adopt the license conditions requested by Google.

Cell phones are merely pieces of equipment, software is separately loaded. It is ridiculous consumers lack choice in this market. Should the F.C.C. pander to wireless monopolies like Verizon and Cingular, I am certain voters will move for Congress to legislate.

I would much prefer experts in the F.C.C. bringing this consumer benefit to bear.

Very truly yours,
Sarah C. Little
